Breast Health. Saving Lives Together.

Convenience drives breast cancer screening compliance, and compliance saves lives.

 **Onsite**
WOMEN'S HEALTH

(Insert practice name) has partnered with Onsite Women's Health to improve breast cancer screening compliance by offering your patients the comfort, convenience and continuity of in-office screening mammography. Through this partnership, your patients will be able to receive their annual screening mammogram in conjunction with their provider visit, which ultimately increases breast cancer screening compliance rates.

About Onsite Women's Health

WHAT YOU CAN EXPECT FROM ONSITE WOMEN'S HEALTH:

- A turnkey 3D screening mammography platform with the most up-to-date mammography equipment and software, including **point-of-care breast density assessment software**
- An assigned team to support your program operations, including breast-specialized radiologists, certified mammography technologists and a regional operations support team – complete with backup mammography staff coverage
- Screening mammogram results within a **24 to 48-hour turnaround time***
- Marketing and engagement resources for **improved patient compliance** with mammography screening
- Management of patient images, reports and communication
- Responsibility for **MQSA and FDA accreditation** and ongoing inspections

*when prior images are available

WHAT YOUR PRACTICE PROVIDES:

- Space to perform mammography services
- Scheduling all eligible patients for annual screening mammograms
- Monthly well-woman exam data to support patient capture rate assessment
- Billing and collecting from patients and insurance payors for the mammography services provided

HOW YOU CAN SUPPORT OPTIMAL PATIENT CAPTURE:

- Understand, support, and participate in implementing the **Five Touchpoints*** (see insert) in your practice
- Become a provider 'Mammography Champion' to encourage staff and patients to schedule mammograms

Frequently Asked Questions

HOW ARE PATIENT PRIOR IMAGES MANAGED?

Onsite supports obtaining your patient's prior exams from their previous imaging facility. If priors are unavailable at the time of the exam, the exam will be held for up to (insert days) days before releasing to the radiologist to interpret. At the same time, our team will continue attempts to receive them. This ensures the radiologist has the most information for comparison prior to interpreting the exam.

HOW DOES BILLING FOR THE EXAM WORK?

Onsite bills the practice monthly based on our contracted rates; your practice bills the patient/insurance payors.

WHAT HAPPENS IF MY PATIENT NEEDS FOLLOW-UP AFTER HER SCREENING MAMMOGRAM?

Onsite works with your practice on the preferred workflow for navigating patients to downstream care needed (i.e. diagnostic imaging). Onsite follows the patient through her care journey in an effort to ensure we are aware of when the patient should be returned to screening.
