

What Our Partners Are Saying About Onsite Women's Health

"Onsite is kind of a brand-new car ready to go. You put the key in and drive off the lot. Everything is ready and functioning and works well with no hassles — really no worries."

Robert Paré, MD

Women's Health Specialists | Raleigh, NC

"One of the things that Onsite brings to the table is their patient information network—PINK. It handles all the follow up with our patients. It handles obtaining all the different scans and images that needed to be done from previous mammography services the patient has had, so that way my staff doesn't have to worry about doing it. And PINK and our EMR system interface with each other. It's seamless information sharing."

Shane Gerovac, Practice Administrator

Mid-Carolina Obstetrics and Gynecology | Raleigh, NC

"If you're going to be a high-quality, top-notch practice, you do everything you can to take care of your patients. Onsite gave us another opportunity to make it better. To have something more to give and really help people. So to me, that matters."

Robert Monteiro, MD

Wake Internal Medicine Consultants, Inc. | Raleigh, NC

"It's [Onsite] been phenomenal from Day One, and it continues to grow in the right ways. My barometer for judging things is how our physicians are responding to the services being offered to their patients, and I've heard nothing but compliments from them."

Matt Johnson, Chief Administrative Officer

Wake Internal Medicine Consultants, Inc. | Raleigh, NC

"[We] had an excellent feeling that Onsite would be our true partners in this and help us to make it successful. And I think that's, you know, precisely what they've done."

Fran Sembert, Practice Manager

Wendover OBGYN | Greensboro, NC

"We see many women for their well-woman care and we're seeing higher rates of breast cancer screenings, just sheerly by the convenience of having it so close."

Amy Cooley, MD

Orange Family Physicians | Orange, VA

"We as doctors aren't aware of all the intricacies of making this [service] run smoothly; we have to have the confidence and be comfortable working with a company that knows precisely what they're doing. They handle every detail for us. I feel like they have so many safety nets in place that things don't fall through the cracks."

Amy Groff, MD

Mid-Carolina Obstetrics & Gynecology | Raleigh, NC
